POND KITS

Aquascape Ecosystem Pond Approach

Ecosystem ponds work with nature, not against it, providing an all-natural, low-maintenance piece of paradise. Each component of the ecosystem pond plays a key role in keeping ponds balanced, clean, and clear.

Filtration System

Includes the use of both a biological and a mechanical filter.

- A BioFalls® filter provides surface area for beneficial bacteria to colonize and remove excess nutrients from the water.
- A pond skimmer pre-filters the water and houses the pump, collecting surface debris and reducing pond maintenance.

Rocks and Gravel

Rocks and gravel protect the liner, naturalize the pond bottom, and provide tremendous surface area for beneficial bacteria to break down excess nutrients in the water.

Circulation System

Proper water flow throughout the pond helps to maintain necessary oxygen levels, provide beauty, optimize water quality, and minimize maintenance.

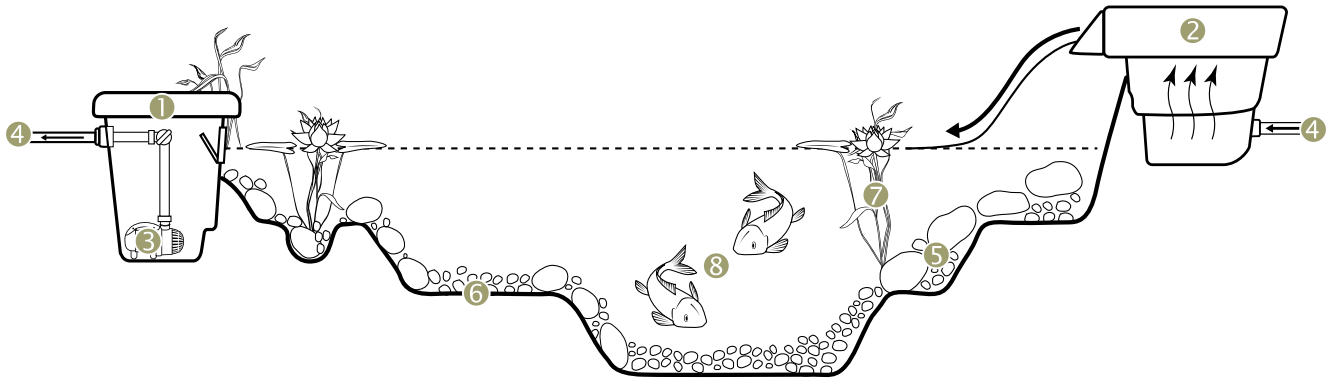

Fish

Fish make great pets and are an integral part of any ecosystem. Not only do fish provide nutrients for your aquatic plants, but they also graze on excess algae growth, reducing maintenance.

Aquatic Plants

Plants, Mother Nature's true filters, provide color and texture and help to balance the entire pond ecosystem, minimizing maintenance and improving water conditions by absorbing excess nutrients.

PONDLESS® WATERFALL KITS

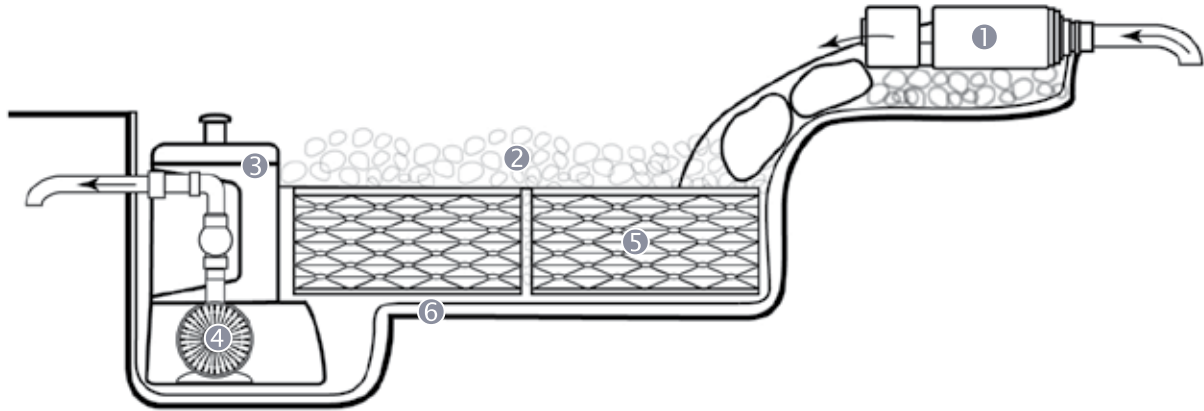

What is a Pondless® Waterfall?

A Pondless® Waterfall is simply a re-circulating waterfall or stream without the presence of a pond. The waterfall works by pumping water from a large, in-ground reservoir up to the top of the waterfall, allowing the water to flow back down into the reservoir. This simple recirculation system is easy to install, low-maintenance, and ideal for families with young children or pets that love to play in the water.

Enjoy the beauty and soothing sounds of a waterfall in any location. Tuck a small waterfall near the front entrance of your home to greet visitors, or add a meandering stream to your backyard.

You can easily add a pond to your waterfall later, if you decide you'd like to keep fish and enjoy a larger variety of aquatic plants.

FILTRATION

The Science Behind Filtration

There are two forms of filtration critical to maintaining a healthy ecosystem pond: mechanical and biological. Through mechanical and biological filtration, the water garden will process a variety of nutrients found in the system, including fish waste, uneaten fish food, leaves, and runoff from lawns.

How to Choose the Right Filter for Your Pond

To keep your pond or water feature looking beautiful, it is important to provide proper filtration. There are advantages to every type of filter, so we will list the features and benefits of each option, making it simple and easy to select the correct filter for your application.

New Ponds

The advantage of choosing the right filter before you get started should not be underestimated. Aquascape takes an ecosystem approach to water gardening. This approach uses a skimmer and BioFalls®. The skimmer removes leaves and debris from the surface of the pond, optimizing water quality. A BioFalls® Filter performs two very important functions: it supports mechanical and biological filtration and provides a great start to any waterfall.

Existing Ponds

In some circumstances it can be challenging to add a skimmer and BioFalls® to an existing system. Perhaps the shape or building technique makes it prohibitive. In this situation we recommend the use of an UltraKlean™ Pond Filter, Submersible Pond Filter, Pond Waterfall Filter, or Pond Filter Urn. These filters will retrofit quickly into existing systems and provide efficient mechanical and biological filtration.

Pond Skimmer Filters

Pond skimmers are designed to eliminate water quality problems and reduce maintenance by removing debris before it sinks to the bottom of the pond, allowing a pond to be installed anywhere, even beneath trees. Because the skimmer removes debris before it reaches the pump, it acts as a pre-filter, reducing pump maintenance and making pump access quick and easy. All pond skimmers include a limited lifetime warranty.

Pondless® Waterfall Vault

Pondless® Waterfall Vault
#49000

Packaged Weight: 14 lb

The Pondless® Waterfall Vault is the ideal pump vault for use in Pondless® Waterfalls, Rainwater Harvesting Systems, and large fountains, effectively protecting the pump and simplifying maintenance.

- Simple to install and maintain
- Fits a wide range of pump sizes and flow rates
- Ideal for use with the AquaBlox® Water Storage Modules
- Extensions can be used to extend the height for deeper applications
- Made from durable rotationally-molded polyethylene

Pondless® Waterfall Vault Extension
#49001

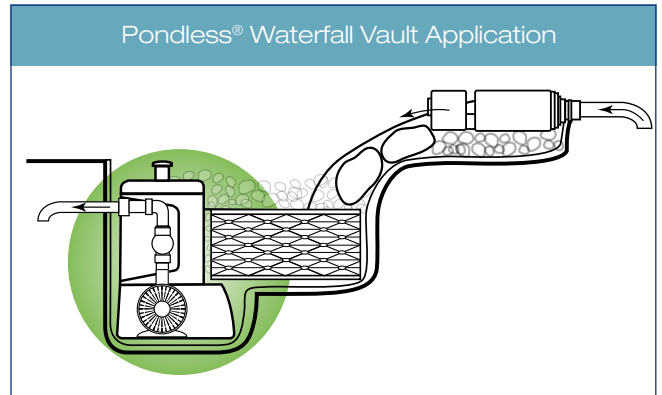

Packaged Weight: 5.4 lb

Slides onto the Pondless® Waterfall Vault to increase its height for applications using AquaBlox® Large Water Storage Modules or taller pumps.

Features of the Pondless® Waterfall Vault

- ① Built-in water level inspection port allows the lid to be buried out of sight
- ② Extra wide opening provides easy pump access
- ③ Excellent water circulation through water intakes
- ④ Large interior fits a wide range of pump sizes

UltraKlean™ Pond Filters

Aquascape UltraKlean™ Pond Filters provide optimum water quality and crystal clear pond water. The unique sponge-free design minimizes maintenance and maximizes efficient mechanical and biological filtration. The simple-to-use cleaning feature allows the unit to be backwashed in less than five minutes without opening the canister or getting hands dirty.

- Efficiently traps dirt and debris
- Includes high-output UV clarifier and integrated electronic bulb-saver function
- Easily integrated into new or existing ponds
- Eliminates green water caused by suspended algae

UltraKlean™ Pond Filtration Kits

Aquascape UltraKlean™ Pond Filtration Kits take the guesswork out of selecting the correct pump and filtration combination for any new or existing pond. Three kit sizes are available, ensuring there is a filtration kit for almost any pond.

UltraKlean™ 1500 Pond Filtration Kit
#95058

Packaged Weight: 38 lb

Pressure Filter and Pump Kit Includes:

- UltraKlean™ 2000 Pond Filter with integrated 14-Watt UV clarifier/sterilizer
- AquaForce® 1000 Solids-Handling Pond Pump
- Kink-Free Pipe—1.5" x 25'
- (4) Stainless Steel Hose Clamps
- Provides filtration for ponds up to 1,500 gal / 5,678 L

UltraKlean™ 2500 Pond Filtration Kit
#95059

Packaged Weight: 40 lb

Pressure Filter and Pump Kit Includes:

- UltraKlean™ 2000 Pond Filter with integrated 14-Watt UV clarifier/sterilizer
- AquaForce® 2700 Solids-Handling Pond Pump
- Kink-Free Pipe—1.5" x 25'
- (4) Stainless Steel Hose Clamps
- Provides filtration for ponds up to 2,500 gal / 9,464 L

UltraKlean™ 3500 Pond Filtration Kit
#95060

Packaged Weight: 45 lb

Pressure Filter and Pump Kit Includes:

- UltraKlean™ 3500 Pond Filter with integrated 28-Watt UV clarifier/sterilizer
- AquaForce® 5200 Solids-Handling Pond Pump
- 2-Way Flow Control Valve
- Kink-Free Pipe—1.5" x 25'
- (4) Stainless Steel Hose Clamps
- Provides filtration for ponds up to 3,500 gal / 13,249 L

UltraKlean™ 1000 Pond Filtration Kit
#77014

Packaged Weight: 32 lb

Filter and Pump Kit Includes:

- Signature Series 1000 BioFalls® Filter
- AquaForce® 2700 Solids-Handling Pond Pump
- Kink-Free Pipe—1.5" x 25'
- (4) Stainless Steel Hose Clamps
- Provides filtration for ponds up to 1,000 gal / 3,800 L

Submersible Pond Filter

The Aquascape® Submersible Pond Filter provides efficient mechanical and biological filtration. This unobtrusive filter can be added to the intake of almost any submersible water pump, resulting in crystal clear water while reducing pond pump maintenance.

- For ponds up to 800 gallons
- Provides mechanical and biological filtration
- Pre-filters pump for reduced maintenance
- Removable cage for easy cleaning
- Keeps pond water clean, clear, and healthy
- Includes pre-filtration sponge and ceramic filtration rings

Submersible Pond Filter

#95110

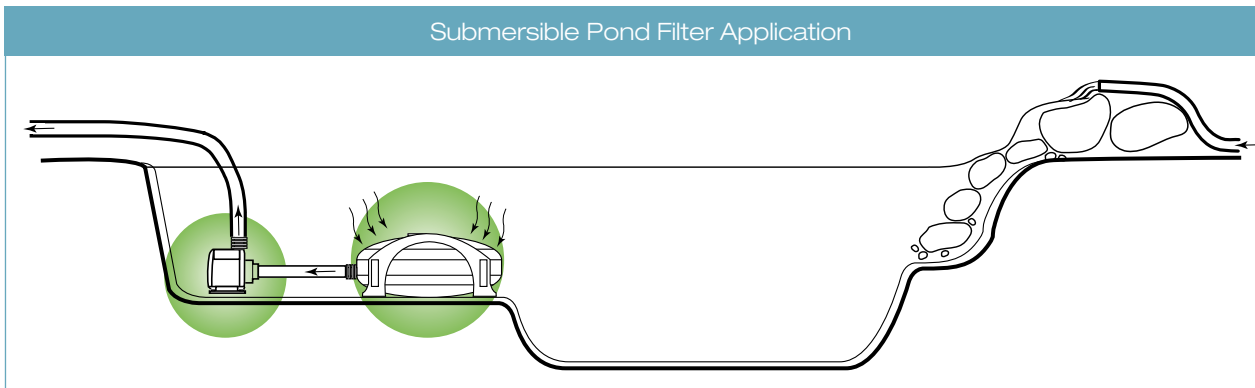

Packaged Weight: 4.5 lb

Features of the Submersible Pond Filter

- ① The large surface area and small openings of the cage prevents large debris from clogging the filter
- ② The pre-filtration sponge provides efficient mechanical and biological filtration and dramatically reduces pump maintenance
- ③ The included threaded intake and multi-hose adapter makes it easy to adapt to most pond pumps with a small piece of kink-free pipe or threaded fitting
- ④ The ceramic filtration rings provide surface area for beneficial bacteria to colonize, providing efficient biological filtration

Waterfall Spillway

Waterfall Spillway #77000

Packaged Weight: 9 lb

The Waterfall Spillway is a cost-effective solution to create the starting point of a beautiful waterfall and stream.

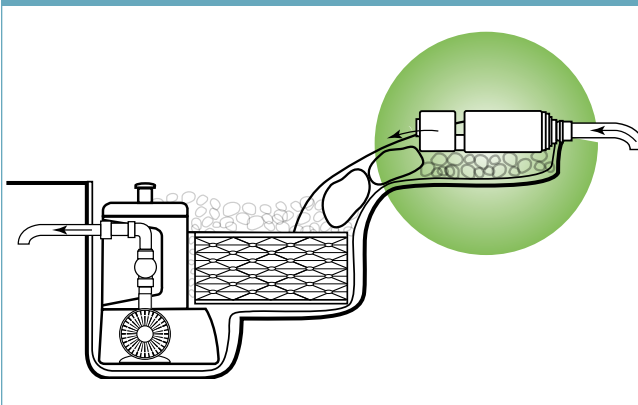

- Creates smooth, consistent, leak-free water flow
- The durable design makes it easy to disguise by allowing soil, rocks, or logs to be placed directly on top of the unit
- Ideal for starting waterfalls on Pondless® Waterfall systems, where, due to the absence of fish, biological filters aren't necessary
- Excellent choice for designing additional waterfalls and streams onto new or existing ponds that already have a biological filter
- Build behind hardscape walls to provide a more formal waterfall design
- Use multiple Waterfall Spillways to design larger, more complex waterfall configurations

Features of the Waterfall Spillway

- ① Durable design allows boulders, logs, or other creative landscape material to be set directly on top, helping to camouflage the spillway into the surrounding landscape
- ② Watertight connection using the fitting on the back of the Waterfall Spillway
- ③ Wide 22" spillway handles flow rates up to 7,500 GPH
- ④ Internal barriers provide a smooth-flowing waterfall

IonGen™ System G2

The IonGen™ System G2 electronic water clarifier allows you to spend your time relaxing next to your water feature instead of maintaining it! The IonGen™ effectively removes debris without the use of traditional liquid chemicals and is designed with a microprocessor that sends a signal to its ion producing probe, helping to control debris throughout the entire water feature.

- Simple to install
- Compatible with water containing fish and plants
- Energy efficient
- Treats ponds up to 25,000 gallons
- Complete with electronic control panel, outdoor-rated transformer, flow chamber, probe, probe fittings, probe holder, copper test kit, alkalinity test kit and owner's manual

IonGen™ System G2

#95012

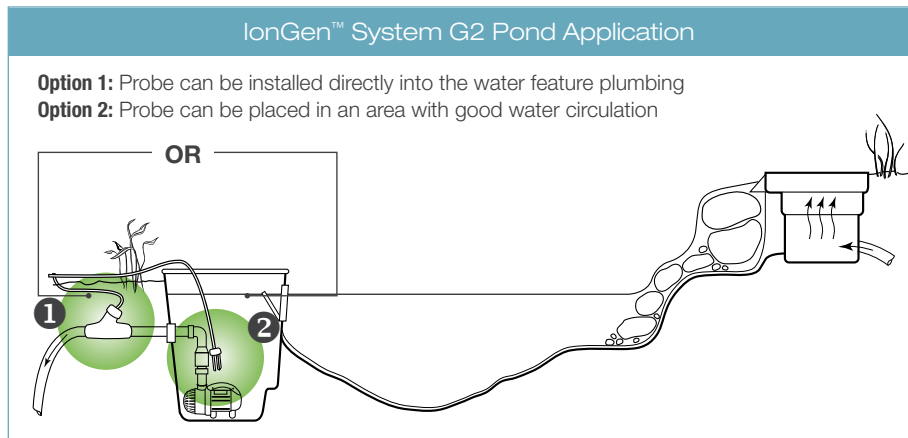

Packaged Weight: 3.3 lb

Packaged Dimensions: 14"L x 4.5"W x 18"H

Features of the IonGen™ System G2

- ① Weatherproof control panel
- ② Easy-to-read digital display
- ③ Indicator notifies you when the probe needs to be replaced
- ④ Adjustable ionization level
- ⑤ Durable quick-connect electrical connections
- ⑥ Tool-free probe installation
- ⑦ Angled probe helps deflect debris and reduce clogging
- ⑧ 2" threaded inlet and outlet

FITTINGS INCLUDED

2 x 1", 1/4", 1/2" Multi-Hose Fitting,
2 x 2" PVC Slip Fitting

IonGen™ G2 Probe Holder
#95077

Packaged Weight: 0.5 lb

- Allows for installation of G2 Probe without flow chamber
- Can be used in a filter, such as a skimmer or Pondless® Waterfall Vault
- Straps onto any pipe or check valve from 1–4 inches in diameter

IonGen™ Probe for the G2 System
#95016

Packaged Weight: 0.5 lb

- For 2nd generation flow chamber
- Includes 5 foot quick-connect cable

IonGen™ Probe for the G1.5 System
#95072

Packaged Weight: 1 lb

- For 1st generation PVC tee-style flow chamber and the G2 control panel
- Includes 5 foot quick-connect cable

CU/Copper Test Kit
#96020

Packaged Weight: 0.2 lb

- Measures residual copper
- 25 tests per kit

KH/Alkalinity Test Kit
#96019

Packaged Weight: 0.2 lb

- Measures KH/alkalinity
- 60 tests per kit

UltraKlear® UV Clarifier

The Aquascape UltraKlear® UV Clarifier uses a technologically-advanced T5 high-output UVC bulb to eliminate 'green water.' The Aquascape UltraKlear® UV Clarifier features a swirl sleeve which directs the water around the UV bulb, maximizing contact time and increasing UV efficiency up to 50% over traditional UV clarifiers.

- Effectively clears unsightly green (pea soup) water algae blooms
- Simple and easy to use, install, and maintain
- Features a swirl sleeve to optimize UV efficiency
- High-output UV bulb maximizes performance
- Easy-to-remove bulb and quartz sleeve
- Can be mounted horizontally or vertically

UltraKlear® 1000 UV Clarifier

UltraKlear® 5000 UV Clarifier
#95038

Packaged Weight: 10 lb
Dimensions: 43"L x 5.5"W x 3.75"H

Features of the UltraKlear® UV Clarifier

- ① Narrow contact chamber increases effectiveness of UV light
- ② Internal sleeve increases contact time, thus increasing efficiency
- ③ Additional side water flow output allows for easier installation
- ④ High-output (HO) T5 bulb maximizes effectiveness
- ⑤ On/off indicator provides quick verification
- ⑥ Mounting brackets make it simple to attach the unit to a vertical surface
- ⑦ High-quality quartz sleeve maximizes bulb output
- ⑧ Mechanical safety switch automatically turns off bulb when the ballast/ bulb is removed
- ⑨ Electronic ballast ensures optimum wattage and bulb output

Additional Pond Filters

These filters are ideal for smaller ponds, including preformed ponds or container water gardens. These filters can be easily incorporated into existing ponds, and are ideal for use with Aquascape Ultra, EcoWave, AquaSurge®, or AquaForce® Pumps.

Pond Waterfall Filter
#77020

Packaged Weight: 11 lb

- Provides efficient mechanical and biological filtration for ponds up to 1,000 gallons
- Includes rigid filter mat and biological filter media net

Features of the Pond Waterfall Filter

- ① Durable, circular construction ensures maximum strength
- ② Filter mat provides ideal mechanical and biological filtration
- ③ Included filter media net holds biological filter media (filter media sold separately)
- ④ Filter rack provides support for filter media
- ⑤ Fitting accepts 1", 1¼", and 1½" pipe sizes

Small Pond Filter Urn
#77006

Packaged Weight: 16.1 lb

Dimensions: 20"L x 11"W x 11"H

Features of the Pond Filter Urn

- ① Removable filter lid allows easy access for cleaning
- ② Decorative filter housing can be easily incorporated into any setting
- ③ Inlet hose accommodates most small pumps
- ④ Mechanical filtration removes debris
- ⑤ Ceramic filtration rings provide bacteria with a large surface area for colonization

AquaBlox® Water Storage Modules

AquaBlox® Water Storage Modules provide an efficient way to maximize water storage capacity in Pondless® Waterfall reservoirs, Rainwater Harvesting Systems, and permeable paver applications.

- Over 3 times more water storage capacity than gravel
- Holds approximately 7.4 gallons of water per cubic foot, compared to gravel, which holds approximately 2.2 gallons of water per cubic foot
- Extra water storage capacity means less time topping off reservoir due to evaporation
- Easier to clean and less prone to clogging than traditional gravel basins
- Allows for a smaller reservoir footprint
- Less labor required to excavate and move gravel
- Uses less liner and geotextile underlayment than reservoirs constructed with gravel

Snorkel® and Centipede® Wetland Filter

Our patented Snorkel® Vault and Centipede® Module were specifically designed to tackle the common issues that plague large scale water features. They are modular in design, allowing builders and designers the flexibility to expand the system to meet their needs.

- Highly effective at removing sediment (suspended solids) from ponds
- Easily access collected sediment with the Snorkel® Vault, reducing the need for costly and invasive dredging
- Improves water clarity
- Works on earth bottom and liner membrane ponds
- Reduces the physical and chemical maintenance that goes along with removing algae
- Easily retrofitted onto existing ponds

Large Snorkel® Vault and Cap
#29064

Packaged Weight: 27 lb

- Allows pump to be dropped in for easy cleaning
- Four ports for Large Centipede® Module attachment

Large Snorkel® Vault Extension
#29068

Packaged Weight: 10 lb

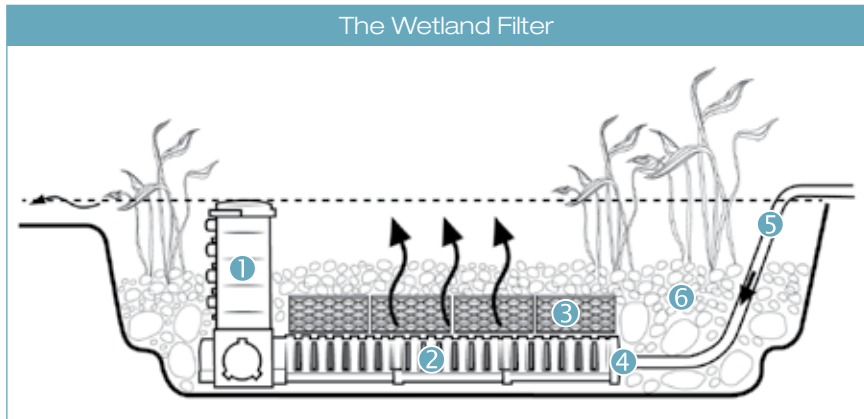

- For use when creating deeper basins or using the AquascapePRO 10,000 or 12-PN pump

Large Centipede® Module
#29065

Packaged Weight: 29 lb

- Sits at the lowest point in the filter

Container Water Garden Filter

The Aquascape Container Water Garden Filter is a complete solution for container water gardens or containers with stagnant or non-moving water, including birdbaths and water containers holding pond plants like lotus or waterlilies.

- Provides ideal filtration for container water gardens up to 50 gallons
- Magnetically-driven motor is simple and easy to maintain
- Extremely energy-efficient
- Durable pre-filter water intake design prevents clogging and reduces pump maintenance

Container Water Garden Filter
#77005

Packaged Weight: 0.8 lb
Dimensions: 2"L x 1.5"W x 7"H

Features of the Container Water Garden Filter

- ① Adjustable spray bar adds surface movement and oxygen to the water
- ② Integrated suction cups adhere the filter to surfaces like the shelf in the Aquascape Patio Pond
- ③ Mechanical and biological filter sponge and filter carbon reduces maintenance and provides excellent filtration
- ④ Protective pump cage and pre-filter prevents debris from clogging or damaging pump

BioBalls Biological Filter Media

Aquascape BioBalls provide a textured surface area (19 square inches per BioBall) for beneficial bacteria to colonize and grow, keeping pond water clean, clear, and healthy. BioBalls are easy to clean, long lasting, and lightweight, making them the ideal filtration media for use in biological filters.

PUMPS

Pumps

Selecting the proper submersible water pump is extremely important in order to achieve optimum performance of your pond or water feature. There are three basic types of water pumps available in the ornamental pond industry: direct-drive, asynchronous, and magnetically-driven pumps (also known as mag-drive). The following section will help you make the right selection. If you have questions about pump selection, please visit our website or contact Aquascape Customer Care.

Direct-Drive

Direct-drive water pumps provide consumers with a high torque, high head height pump option. Direct-drive pumps are generally easier to maintain because of their ability to handle larger solids. It is important to note that these pumps have to be operated within a specific performance curve to optimize lifespan.

Mag-Drive

Mag-drive water pumps are a simple and easy-to-use solution for small water features including decorative fountains and spitters. These pumps are easy to retrofit into existing water features. Mag-drive pumps have only one moving part, making them inexpensive and easy to maintain. Mag-drive pumps are also extremely quiet and energy-efficient.

Asynchronous

Asynchronous water pumps are a hybrid between a direct-drive and mag-drive pump. They have only one moving part, making them less expensive and easy to maintain. This type of pump is extremely energy-efficient, and choosing one over a traditional direct-driven pump often pays for itself quickly in power consumption savings.

AquaSurge® Pond Pumps

AquaSurge® asynchronous pond pumps combine energy-efficient performance, high flow rates, and ease of maintenance, making this pump the perfect choice for pond owners. AquaSurge® pumps are ideal for use in pond skimmers and Pondless® Waterfall Vaults.

- Extremely energy-efficient, saving hundreds of dollars over traditional water pumps
- Asynchronous motor technology provides high torque, trouble-free performance
- Oil-free design prevents pond contamination
- Made for continuous use
- Will not corrode or rust
- Can be used vertically or horizontally
- Plumbing adapter fittings included

Features of the AquaSurge® Pond Pumps

- ① Compact size makes it the perfect pump for pond skimmers
- ② Built-in cord strain relief protects the cord from being damaged
- ③ Asynchronous motor technology makes this pump more powerful than traditional magnetically-driven pond pumps
- ④ Unique ceramic shaft with cooling port prevents the pump from overheating
- ⑤ Simple and secure threaded disconnect allows the pump to be easily removed from the skimmer for maintenance or winterization
- ⑥ Integrated rubber feet prevent noise and vibration
- ⑦ The rotational ball output allows the discharge position to be easily adjusted
- ⑧ Included pump stand allows for vertical positioning

REMOTE INCLUDED

Adjustable Flow Pond Pump Remote and Receiver

Features include:

- Numeric flow indicator
- Includes remote control holster for quick and easy mounting
- Receiver includes mounting hardware
- Sleek and ergonomic design

PL and PN Solids-Handling Pond Pumps

The PL and PN series pumps are known for durability, performance, and value. The direct-drive motor and semi-vortex impeller design enables the pump to efficiently and effectively handle solids, resulting in less maintenance and trouble-free performance. The built-in thermal overload protects the pump from damage if operated in low water conditions.

- Ideal for use in pond skimmer filters and the Pondless® Waterfall Vault
- Semi-vortex solids-handling impeller reduces clogging and decreases maintenance
- Continuous duty motor operates at lower temperatures to extend pump life
- Constructed of stainless steel and composite resin for strength and corrosion resistance

AquaForce® Solids-Handling Pond Pumps

AquaForce® asynchronous, solids-handling waterfall and filter pumps combine energy-efficient performance, high flow rates, and ease of maintenance, making this pump the ideal choice for discerning pond owners. The AquaForce® protective pre-filter cage allows the pump to be placed directly into the pond. AquaForce® pumps are able to pump solids up to ¼" inch in diameter, making it ideal for use with external pressure filters or Aquascape waterfall filter systems.

- Extremely energy-efficient, resulting in considerable annual energy savings
- Asynchronous motor technology provides high torque, trouble-free performance
- Handles solids up to ¼" in diameter

Features of the AquaForce® Pond Pumps

- ① Protective pump cage prevents large debris from clogging or damaging pump, reducing maintenance
- ② Large cage openings allow solids to be easily passed and filtered, preventing the pump from being clogged or damaged
- ③ Asynchronous motor technology makes this pump more powerful than traditional magnetically-driven or "mag-drive" pond pumps
- ④ The simple and secure threaded disconnect allows the pump to be easily removed from the pond for maintenance or winterization without removing hose clamps or plumbing assembly
- ⑤ The wide, flat shape of the pump cage makes it stable and easy to place in the pond
- ⑥ The rotational ball output allows the pump discharge position to be easily adjusted, making this pump ideal for all shapes and sizes of ponds

REMOTE INCLUDED

Adjustable Flow Pond Pump Remote and Receiver

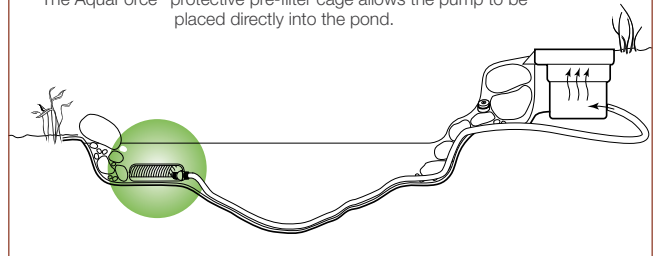

Features include:

- Numeric flow indicator
- Includes remote control holster for quick and easy mounting
- Receiver includes mounting hardware
- Sleek and ergonomic design

NOTE: Only compatible with AquaForce® and AquaSurge® Adjustable Flow Pond Pumps

AquaForce® Pond Application

The AquaForce® protective pre-filter cage allows the pump to be placed directly into the pond.

Pond Powerhead Application

AERATION

Every biological process that occurs in ponds is dependent on oxygen. This is especially important in warmer temperatures or at night when plants are not converting sunlight into oxygen. Pond aerators supply dissolved oxygen directly to ponds and other water features, helping all biological processes and resulting in healthier fish and plants. Proper aeration creates a stable pond environment, keeping water healthy, clean, and clear. Aeration can also be used during cold winter months to keep a hole open in the ice formed at the surface of the pond, allowing for necessary de-gassing.

Aquascape provides a complete line of pond aeration supplies, making it easy to enhance your pond or water feature with effective aeration. Our aeration products are available as complete kits or individual components, including compressors, diffusers, weighted tubing, and more. The specification chart and following information will help you to make the right product selection. If you have any questions about pond aeration, please visit our website or contact Aquascape Customer Care.

2-Outlet and 4-Outlet Pond Aeration Kits

Aquascape 2-Outlet and 4-Outlet Pond Aeration Kits provide efficient aeration for ponds and water features up to 3,500 gallons, resulting in a healthier ecosystem and happier fish and plants.

- Extremely energy-efficient
- Quiet operation
- Simple to use and maintain
- Durable outer housing prevents damage
- Includes winter resistant air line, preassembled check valves, and air discs

Automatic Dosing System

In order for water treatments to work correctly and to maintain optimum water quality, they should be added consistently and on a regular basis. The Aquascape Automatic Dosing System accurately and consistently applies your choice of specially-formulated water treatments, eliminating the guesswork and routine of manually adding water treatments to your water feature.

- Helps maintain optimum water quality
- Easy to use and fully programmable
- Can be used on almost any pond, fountain, or water feature
- Dependable and quiet operation

Each type of water feature has its own set of requirements to maintain optimal water quality. In order to provide optimum results, we have created two categories of treatment listed below.

Automatic Dosing Treatment Reference Chart for Ponds

MAINTAIN

1

Maintain for Ponds reduces maintenance and helps maintain optimum water quality by combining our most effective treatments into one powerful treatment. The formulation includes a beneficial bacteria blend, phosphate binder, flocculant, and dextoxifier, resulting in a healthy, crystal-clear, maintenance-free pond.

CLEAN

2

Clean for Ponds uses a powerful blend of heterotrophic bacteria to digest organic waste or sludge caused by uneaten fish food, fish waste, and leaves or debris, naturally cleaning the rocks and gravel. Reducing organic waste helps keep ponds and pond filters clean while optimizing water clarity and quality.

CLEAR

3

Clear for Ponds uses a concentrated formulation of clarifiers to effectively resolve existing water quality problems, including cloudy or discolored water and issues with debris attached to rocks and gravel. The formulation also contains a phosphate binder which works to prevent issues with water clarity and debris buildup.

PROTECT

4

Protect for Ponds uses an all-natural formulation of tea tree oil and other plant-based biopolymers to effectively protect pond fish, reducing fish stress, preventing parasites and infections, and accelerating healing of superficial wounds, scrapes, and breeding abrasions. Protect is great for use after handling fish or performing cleanouts and water changes.

Automatic Dosing Treatment Reference Chart for Fountains

PREVENT

1

Prevent for Fountains keeps fountains and water features clean and clear, controlling white-scale buildup, foam, stains, and unsightly water conditions without damaging fountain surfaces. The formulation contains a special blend of clarifiers, designed to clear and prevent debris buildup in the water and on the surface of fountains, rocks, or gravel. Prevent for Fountains is not intended for use in water features containing fish or plants.

CLEAN

2

Clean for Fountains effectively cleans and clarifies fountains with standing water, plants, or fish, significantly reducing maintenance and issues with water quality. The formulation contains a flocculant and powerful phosphate binder to help clear and prevent unsightly suspended debris. Clean for Fountains is safe for use with fish and plants.

PREDATOR CONTROL

Pond fish can be vulnerable to a variety of predators, including large birds such as the pesky blue heron. Fortunately, Aquascape provides several products to help pond owners prevent predators from harming their prized fish. Our popular ornamental deterrents help keep koi and other pond fish safe.

Floating Alligator Decoy
#93000

Packaged Weight: 2 lb

Add a little fun to your pond while protecting your valuable fish. The natural body movement will deter herons and other predators from visiting your pond.

- Three hinged body parts allow gator to float freely and appear lifelike, deterring pond predators
- Detailed in non-fading, no-glare, all-weather paint

Blue Heron Decoy
#81030

Packaged Weight: 32.7 lb

Product Dimensions: 25"L x 7"W x 26.5"H

Deter herons from coming to your pond by tricking them into thinking another heron is already there.

- Looks life-like
- Quick and easy set-up
- Hand-painted with non-fading, no-glare, all-weather paint
- Surface treated to prevent paint flaking
- Molded from durable, lightweight polymer

SEASONAL CARE

Selecting Your Seasonal Care Products

The following components are vital to ensure that your water feature is properly maintained and your fish are cared for in the colder months of the year.

Cold Water Beneficial Bacteria (for spring and fall) — see page 67 for more information

Beneficial bacteria living in the biological filter and throughout the rocks and gravel in the pond are a key component to achieving crystal clear water and reducing pond maintenance. The bacteria, similar to aquatic plants, consume excess nutrients but are also capable of breaking down organic debris. It is important to the pond's ecosystem for these maintenance microbes to become established as early in the spring as possible. Aquascape Cold Water Beneficial Bacteria is perfect for both spring and fall because it works at temperatures below 40°F and contains pure strains of concentrated beneficial bacteria that go to work quickly, cleaning and balancing your pond.

Premium Cold Water Fish Food (for spring and fall) — see page 83 for more information

In the colder months of the year, when the water temperature is below 60°F, your fish's metabolism slows down in preparation for hibernation. It is important during these times to either eliminate fish feeding from your daily regimen or switch to a food that is formulated for low water temperatures. Aquascape Premium Cold Water Fish Food is scientifically formulated to provide quality nutrition to all pond fish, including goldfish and koi. The inclusion of spirulina and wheat germ helps make the food easier to digest in colder water temperatures.

AquaForce® — see page 38 for more information

In the colder months, it is important to start thinking about protecting your fish by ensuring that there's a hole open in the ice all winter long. Our AquaForce® pump is a recirculating bubbler pump designed to sit in the pond and oxygenate the water. The flow from the pump will bubble at the surface of the pond and maintain an opening in the ice. By keeping a hole open in the ice, you keep the water oxygenated and allow gases to escape.

Pond Aeration — see page 48 for more information

Pond aerators can be positioned 1.5–2 feet below the surface of the pond to maintain a hole in surface ice and provide additional oxygenation for the colder seasons.

AQUATIC PLANT CARE

Aquatic plants are an important part of the water garden. They provide beauty and naturalization with a huge array of plant choices. Most importantly, they help balance the pond's ecosystem and provide valuable biological filtration that removes nitrogen, ammonia, nitrates, and other minerals from pond water. These excess nutrients are often the cause of unsightly water conditions. The end result helps to minimize pond maintenance, leaving more time to enjoy your pond. Without aquatic plants, your pond would not be able to function as a complete ecosystem.

Pond plants can be classified into a few main categories: waterlilies, marginal plants, floaters, and oxygenators. Plants can also be put into two basic types known as "tropical" and "hardy." Hardy plants will over-winter in colder climates and tropical plants are more suited to warmer climates, although tropical plants are often used as annuals in colder climate zones.

Floating Plant Island

Floating Plant Island
#89006

Packaged Weight: 0.4 lb
Dimensions: 15"L x 11"W x 4"H

The AquaScape Floating Plant Island is ideal for displaying plants in deeper areas of the pond or where there are no plant shelves. The floating planter keeps the soil intact and lets water in while protecting plants from fish. Constructed to stay afloat at the surface of the pond, the Floating Plant Island provides stunning options for displaying plants within the pond.

Aquatic Planters

AquaScape Aquatic Planters are ideal for all pond plants. Made from fine, porous material, the planters allow water in while preventing soil from entering your pond. The flexibility of Aquatic Planters makes it simple to place plants between rocks and other form-fitting areas. Aquatic Planters blend into their surroundings and will not break or crack like traditional plastic planters.

- Can be molded to fit in tight spaces
- Will not break or crack
- Keeps soil from escaping

DECORATIVE

Decorative Water Features

Decorative water features include Fire Fountains, container water gardens, stand-alone fountains, bubbling rocks or urns, spitters, and any fountain that incorporates an in-ground reservoir.

Fire Fountains

Fire fountains combine the beauty and elegance of fire and flowing water in a durable, self-contained GFRC (glass fiber reinforced concrete) water feature that sets up in minutes.

Container Water Gardens

Container water gardens are great for people who do not have the space or budget for an ecosystem pond, providing a way to add a miniature pond to any location.

Decorative Spitters

Decorative spitters are often used to add a whimsical touch or create a focal point and water movement to existing ponds or container water gardens. Decorative spitters can also be incorporated into traditional landscapes when combined with a small reservoir or AquaBasin® Mini.

Bubbling Stone Fountains and Spillway Bowls

These larger water features are typically set atop an underground reservoir known as an AquaBasin®. A water pump contained within the AquaBasin keeps circulating the water over the feature.

Fire Fountains

The Aquascape Fire Fountain provides the beauty and elegance of fire and flowing water in a bowl-shaped GFRC water feature. The self-contained water feature sets up in minutes. A fire feature in the center makes this fountain an ideal focal point or centerpiece to any outdoor setting.

AquaBasin® 30 and 45

The AquaBasin® 30 and 45 are engineered to provide a trouble-free, easy-to-install fountain basin for a wide variety of decorative water feature installations, including natural stone, brass, and resin fountains. Their innovative design provides features and benefits that eliminate guesswork, improve water circulation, increase accessibility, and ensure a lifetime of enjoyment.

- Professional-grade, high-density polyethylene is built to last and backed by a lifetime warranty
- Structural deck cylinders reinforce basin strength and provide endless plumbing and lighting configurations
- Large, flat deck design makes it easy to set and position your choice of fountain
- Large corner pump access panel simplifies pump access, fits larger pumps, and sits elevated above the deck, preventing gravel from falling into the basin when removing the lid
- Square shape maximizes water storage capacity
- Protects pump and reduces maintenance

LINER, UNDERLAYMENT, AND GEOTEXTILE

Liner, underlayment, and geotextile are the pond's foundation. Educate yourself on the selection of liners that are available. Don't consider using a liner if it doesn't come with a long-term warranty. It is important to always determine whether the liner you choose is safe for fish that may inhabit the pond.

Underlayment is installed before the liner in order to prevent punctures that may occur from rough or rocky ground. The underlayment serves a couple of purposes. It not only provides protection for the liner against rocky soils and roots, but it allows the ground to breathe from underneath. The earth releases gases and the fabric allows the gases to escape from underneath the liner rather than becoming trapped, causing gas bubbles to push the liner up into the pond.

45 mil EPDM Liner Rolls

Aquascape 45 mil fish-safe EPDM pond liner leads the industry in quality and reliability. Backed by an industry leading 20-year guarantee, Aquascape pond liner is the choice of discerning pond professionals.

- Superior elongation and lay-flat characteristics
- Exceptional resistance to solar UV, ozone, and oxidation
- Ease of installation with no special tools required

PIPE AND PLUMBING

Flexible PVC Pipe makes installations quick and easy. The main advantage of this high-quality pipe is that it has the durability to be glued into standard schedule 40 PVC fittings.

- Simplifies plumbing layouts and installations
- Sun, ozone, and mildew resistant—NOTE: we do not recommend placing flexible PVC pipe in continuous sunlight
- Made in the USA

Kink-Free Pipe is an excellent choice for quick and easy installations without the use of PVC cement. This high quality Kink-Free Pipe is extremely flexible and resistant to crimping or collapsing around tight curves. Kink-Free Pipe works best when used with traditional stainless steel hose clamps and barbed fittings.

- Simplifies plumbing layouts and installations
- Internal spiral prevents crushing and smooth inner wall reduces friction and maximizes flow
- Made in the USA

Pre-cut Kink-Free Pipe is ideal for recirculating water in decorative fountains and other water features without the use of PVC cement. The pieces are cut and packaged in convenient six-foot sections, ideal for installations requiring smaller lengths of pipe.

- Internal spiral prevents crushing and smooth inner wall reduces friction and maximizes flow
- Works best when used with traditional barbed fittings and stainless steel hose clamps
- Made in the USA

Black Vinyl Tubing is ideal for recirculating water in fountains and other water features without the use of PVC glue. Our non-toxic, vinyl tubing is fish-safe, allowing for use in water features containing fish and plants.

- Durable construction
- Prevents kinking
- Flexibility makes installation quick and easy

Plumbing Materials provided by Aquascape include a complete selection of check valves, automatic water fill valves, and a variety of accessories, making it easy to complete any water feature with high quality plumbing products.

- Simplifies maintenance and installation
- Durable, professional quality products
- Easy to adapt to a variety of pipe types and sizes

RAINWATER HARVESTING

Why Harvest Rainwater?

The Aquascape Rainwater Harvesting System (formerly known as RainXchange®) is a sustainable solution for water conservation and stormwater management.

Water Conservation

- According to the World Wildlife Fund, 1.1 billion people worldwide lack access to water and by 2025, two-thirds of the world's population may face water shortages.*
- Capturing and reusing rainwater reduces the community's demand on the municipal water supply, reduces the owner's water bills, and helps avoid strict water schedules.

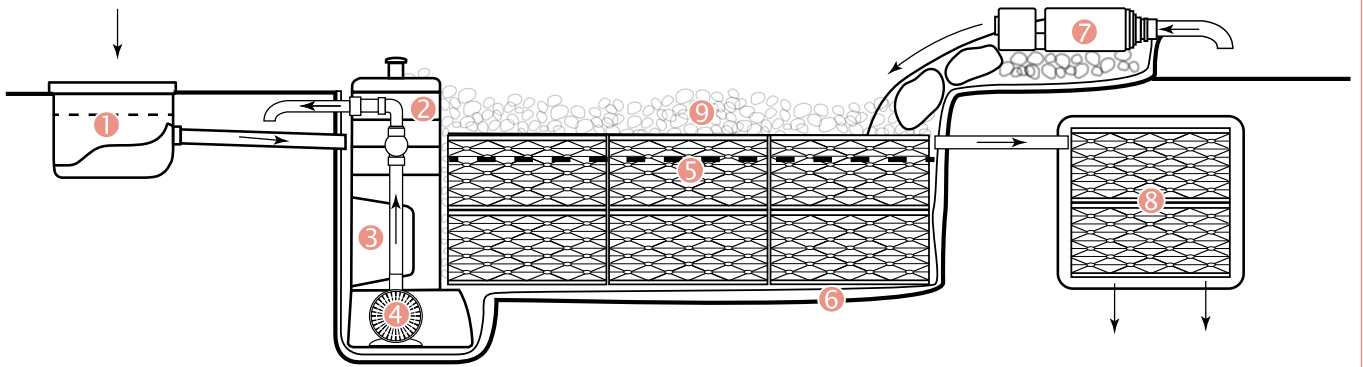

Stormwater Management

- According to the EPA, stormwater run-off is one of the main reasons that our lakes, rivers, and estuaries are not clean enough for fishing or swimming.**
- Rainwater harvesting is a solution for managing stormwater run-off and decreasing flooding.
- Federal, state, and local regulations are requiring stormwater to be managed at the source. The Aquascape Rainwater Harvesting System provides a solution to help meet these governmental regulations.

The Aquascape Foundation is a nonprofit 501(c)(3) organization established in 2008. The mission of the Foundation is to create sustainable solutions for the world-wide water crisis. The purpose of the Foundation is to promote awareness of water as our most precious resource through environmental, educational and philanthropic efforts. One of the ways we accomplish this mission is by utilizing a modified version of the Aquascape Rainwater Harvesting System as a solution to bring clean drinking water to places where people currently have no access. The Foundation also funds the installation of borehole water well systems in areas with unsanitary water sources.

The Aquascape Foundation is utilizing its core technology to end this needless suffering. With this technology we can capture, purify and store thousands of gallons of rainwater, making it accessible and potable. Our technology will not only bring health and wellness to a community, but with an accessible water source, children can focus on education and adults can focus on employment. It's a smart and sustainable solution to a complex problem. Water is Life!
